

Airflow Testing

The Building Performance Centre's Airflow Testing Facility expands and increases the capabilities of our HVAC Performance Laboratory to include extensive Temperature, Pressure and Airflow Analysis services.

Expertise In

- Custom designed evaluation and development testing
- Product compliance testing to ASHRAE, AMCA, ASTM, CSA and HVI standards

Airflow Testing Services

- Airflow Measurement to AMCA-210 Standards
- Airflow Measurement capabilities to 4200 CFM

Fans

In addition, our airflow testing services include the performance evaluations of:

- Economy bathroom ventilators (residential)
- Premium bathroom ventilators (residential)
- Utility ventilators (residential/commercial)
- Single-port / Multi-port ventilators (residential/commercial)
- Whole house ventilators (residential)
- Power attic ventilators (residential/commercial)
- Fans and blowers (residential/commercial)
- Commercial ventilators
- Including fan-light and fan-bulb- heater combinations

Range Hood / Fumehoods

- Economy range hoods (residential)
- Premium range hoods (residential)
- Commercial range hoods/fume hoods

Accreditations

- HVI
